Strong foundation for a solid future

TUNKU ABDUL Rahman University College (TAR UC) offers SPM school leavers a new Foundation programme, which provides a “direct and specialised pathway” to pursue a Bachelor’s degree.

The Foundation in Computing course is conducted by the Centre for Pre-University Studies (CPUS) at TAR UC’s main campus in Kuala Lumpur. The syllabus is skewed towards computer science and IT modules. These provide solid grounding in ICT and allows for a more seamless transition for students moving on to an ICT degree. Enrolment for the September intake is now open.

As a premier digital tech University, the introduction of the Foundation course aptly demonstrates TAR UC’s commitment in providing theoretical and practical training in digital technology. It is proud to be able to cultivate digital-savvy professionals who can take on growing technology trends such as the Internet of Things, the Industrial Revolution 4.0, Artificial Intelligence, and Big Data.

TAR UC also offers other Foundation programmes including Arts, Science, Accounting, Engineering, and Business.

Enrolment for October intake for

The new Foundation in Computing will guide students towards a pathway focused on computer science/IT.

selected Diploma and Bachelor’s degrees is also open at all TAR UC campuses - KL, Penang, Perak, Johor, Pahang and Sabah. Areas of study include Applied Sciences, Computing, Information Technology, Accountancy, Finance, Business, Engineering, Built Environment, Mass Communication, Creative Industries, and Hospitality and Tourism.

Students who have completed their STPM and SPM exams are urged to explore and enquire about their tertiary education options at TAR UC, especially with the September and October intakes now open. Drop by TAR UC’s Info Day from Aug 16 to 18, between 10am and 4pm, throughout all campuses.
