

Laying the foundation for university

MALAYSIAN youths are fortunate to have a wide variety of higher learning institutions to choose from when it comes to pursuing tertiary education. But choosing the right one can be overwhelming.

Tunku Abdul Rahman University College (TAR UC) has over 49 years of excellence in providing pre-university education that has nurtured countless students to unlock their full potential.

Its Foundation programme prepares students to pursue bachelor degree programmes in TAR UC. Conducted by the Centre for Pre-University Studies, the Foundation programme ensures that students are able to gain a deeper understanding of the requisite knowledge to continue in-depth studies at the undergraduate level.

The Foundation programme is divided into Foundation in Arts and Foundation in Science.

To prepare students for a wider range of TAR UC's undergraduate programmes, the Foundation in Arts and Foundation in Science are further divided into two separate tracks, each comprehensively structured with relevant subjects to

TAR UC's Centre for Pre-University Studies offers a conducive learning environment and well-equipped learning facilities.

nurture appreciation of key knowledge that will help students in transitioning from pre-university level to undergraduate studies in their discipline of choice.

In addition, students have two new Foundation programmes to choose from – Foundation in Accounting and Foundation in Engineering, which will be offered

in the May and September intakes.

The Foundation in Accounting is specifically developed to comprehensively equip students planning to pursue a Bachelor of Accounting (Hons) or Bachelor of Commerce (Hons) at TAR UC's Kuala Lumpur main campus, or Bachelor of Business (Hons) Accounting and Finance at the Penang campus.

These intensive programmes help prepare students to pursue professional qualifications from the Association of Chartered Certified Accountants, Chartered Institute of Management Accountants, Institute of Chartered Accountants in England and Wales and Certified Practising Accountants Australia.

Meanwhile, students who choose the Foundation in Engineering will be trained to study engineering or related science degree programmes at TAR UC.

TAR UC's Foundation programme is the best step towards pursuing its bachelor degree programmes. The syllabus is designed with the aim of giving students a solid foundation so they can cope with the academic demands of the bachelor degree programmes.

Lau Kim Hui, who is pursuing a Bachelor of Engineering (Hons) Electrical and Electronics at TAR UC, is one of the many students reaping the benefits of the Foundation programme.

"TAR UC was highly recommended to me due to its reputation for providing excellent education. True enough, the Foundation prog-

ramme helped me to fully understand the fundamentals of the bachelor degree programme I am currently undertaking," he said.

Jerome Looi Jun Qi, another student who completed TAR UC's Foundation programme, is currently pursuing his Bachelor of Business (Hons) Accounting and Finance at the Penang campus.

"What attracted me were the wide selection of courses and affordable fees. The Foundation programme is very comprehensive. As such, the subjects I am studying for my Bachelor degree programme are easier to comprehend," he explained.

■ Visit TAR UC's Open Day from March 12 to April 1 at its main campus in Kuala Lumpur, branch campuses in Penang, Perak and Johor and faculty branches in Pahang and Sabah.
